FYI this request came in and want to share with you guys what OCSPP has prepared below.
Can you let me know if you have any edits for this?

Incoming: By my calculations, reviewing formaldehyde under TSCA could delay releasing health information on the chemical for another six years. To what extent is the move to reconsider formaldehyde instead of just releasing the IRIS assessment of the chemical an effort to delay the need to more strictly regulate it?

Deliberative Process / Ex. 5
